Beschlagbeutel:

### Beschlagbeutel 1011

A		1x
B		1x
C	 5x50	1x
D	 3.5x20	2x

#### Wandbefestigung

Achtung! Die Wandbeschaffenheit ist vor der Montage unbedingt zu prüfen. Verwendung von Dübeln bei Beton und/oder festem Mauerwerk. Bei abweichender Beschaffenheit (z.B. Rahmenbauweise mit Gipskartonplatten, Leichtbausteinen etc.) ist eine andere, der Belastung angemessene Befestigung bauseits vorzunehmen. Beachten Sie, dass in dem Befestigungsbereich keine Elektro-Installationszonen und keine Ver- oder Entsorgungsleitungen vorhanden sein dürfen. Prüfen Sie mit einem geeigneten Leitungssuchgerät. Beachten Sie, dass Kunststoffrohre nicht dedektiert werden.

#### Wall mounting

Please note! Please be sure to test the soundness of walls beforehand. Use plugs for concrete and solid walls. Use different method for lighter masonry. Please note that there must not be any electrical installations nor any electrical connections or leads of any kind in the assembly area. Please ensure this is so by testing the area with a suitable electrical leads search device. Please also note that plastic tubing will not be detected.

#### Fixation murale

Attention! La composition du mur doit absolument être contrôlée. Utilisation de chevilles pour le béton et/ou la maçonnerie dure. Pour les autres types de construction (cloisons en placoplâtre, maçonnerie légère, etc...), il faut prévoir un autre mode de fixation en rapport avec la charge. Veuillez contrôler l'absence d'installations électriques et de conduits dans le secteur de la fixation à l'aide d'un appareil. Veuillez noter que les tubes en matière synthétique ne sont pas détectés.

#### Bevestiging aan de muur

Attentie! Controleer het materiaal waarvan de muur vervaardigd is. I.g.v. beton en schoon metselwerk zijn standaard pluggen voldoende. Voor muren van gips, gasbetonblokken e.d. zijn speciale bevestigingsmaterialen te gebruiken. Let u er a.u.b. op, dat in het muurgedeelte geen elektrische- en afvoerleidingen lopen. U kunt dit controleren met een desbetreffend opspoorapparaat. N.B.! Kunststofleidingen zijn helaas niet op te sporen.

2

**Achtung!** Unfallgefahr bei fehlerhafter Montage.

Die Wangen dürfen nur an festem Mauerwerk bzw. Betondecken und auf tragfähigem festem Untergrund befestigt werden, für welche die mitgelieferten Befestigungsmittel üblicher weise geeignet sind. Die grundsätzliche Eignung des Wandbaustoffes zur Befestigung ist vor Ort vom fachkundigen Monteur zu prüfen.

**Attention!** Risk of accident if wrongly assembled.

The side panel are only to be mounted on solid brickwork or concrete surfaces and on to solid bases capable of bearing such loads and such as are normally suitable for the assembly materials delivered herewith. A qualified assembly technician should test the suitability of any surface to be used for mounting these frames on site.

**ATTENTION! DANGER** en présence d'un montage incorrect.

Le montant doit être uniquement fixé sur un mur solide, un plafond en béton et sur un plancher porteur pour lesquels le matériel de fixation livré est normalement approprié. L'aptitude à la fixation dans les matériaux de construction employés doit être par principe contrôlé sur place par un monteur qualifié.

**Attentie!** Risiko op ongelukken i.g.v. foutieve montage.

De staander dienen bevestigd te worden uitsluitend aan gemetselde muren resp. aan betonnen plafonds en een vaste, voldoende dragende vloeren, waarvoor de bijgevoegde bevestigingsmaterialen normaal gesproken volledig geschikt zijn. De kwaliteit van de bouwmaterialen, waaraan de frames bevestigd worden, zijn ter plekke door een vakkundige monteur te controleren.
